GENERAL INSTALLATION DATA

CAUTION

This equipment is designed and sold for commercial use only by personnel trained and experienced in its operation and is not sold for consumer use in and around the home nor for use directly by the general public in food service locations.

All shipping containers should be checked for freight damage both visible and concealed. This unit has been tested and carefully packaged to insure delivery of your unit in perfect condition. If equipment is received in damaged condition, either apparent or concealed, a claim must be made with the delivering carrier.

Concealed damage or loss - if damage or loss is not apparent until after equipment is unpacked, a request for inspection of concealed damage must be made with carrier within 15 days. Be certain to retain all contents plus external and internal packaging materials for inspection. The carrier will make an inspection and will supply necessary claim forms.

VENTILATION AND CLEARANCES

The installation of any components such as a vent hood, grease extractors, and/or fire extinguishing systems, must conform to their applicable nationally recognized installation standards and/or local building codes.

ELECTRICAL CONNECTION

Before making any electrical connection be sure to read data plate which is located at the bottom of the unit.

ELECTRICAL GROUNDING INSTRUCTIONS

This unit is equipped with a 3-prong (grounding) plug for your protection against shock hazard and must be plugged directly into a properly grounded 3-prong receptacle.

DO NOT CUT OR REMOVE THIS PLUG OR GROUNDING PRONG FROM THE PLUG.

WARNING

CONNECT/PLUG UNIT INTO DEDICATED A.C. LINE ONLY SPECIFIED ON THE DATA PLATE OF THE UNIT.

CONNECT/PLUG UNIT INTO DEDICATED A.C. LINE ONLY SPECIFIED ON THE DATA PLATE OF THE UNIT.

INITIAL START UP

Level unit using the adjustable feet under the unit (approximately 1/2" adjustment).

Before using the unit for the first time, wipe down the exterior and grilling area with a damp cloth. Take to a well ventilated area and heat for approximately 30 minutes. The grill may emit a small amount of smoke as the cooking surfaces reaches 450°F. Do not be alarmed, as the smoke is caused by oils associated with the manufacturing process and will stop when the burn off is complete. Brush off any debris from the grilling surface.

SEASONING THE COOKING SURFACES

The cooking surfaces must be "seasoned" in order to reduce product sticking. To season, bring grill to 300°F, until completed. Brush upper and lower cooking surfaces with a **salt free** liquid vegetable oil. If using an aerosol agent, first apply into a cup and then brush onto cooking surface. Let sit for 20 minutes, and then wipe clean using a warm damp cloth. Repeat if required.

SETTING THE TEMPERATURE

The thermostat control knob is used to set the temperature to your requirements. The maximum set point is 450°F (232°C), the minimum set point is 175°F (79°C). See Knob Settings.

DAILY OPERATION

Check the power cord to insure that it is plugged into a proper outlet.

Check that the thermostat control is turned on.

The pilot light will come on when the thermostat control goes past the 175°F.

Set the thermostat control knob to desired temperature.

Always allow 20 minutes of preheat time before loading the unit with product.

Failure to allow sufficient preheat time will result in unsatisfactory cooking of the first load.

OPERATING HINTS AND SAFETY

Disconnect power to the unit with the switch at the end of each day of operation.

Do not leave the unit in operation without an attendant.

Turn thermostat down to 200°F (93°C) during idle periods. It will take only a few minutes to regain operating temperature.

Use spatula to push excess grease into grease cup after each load of food is cooked.

This will reduce smoking of hot grease and carbonizing.

Do not leave the unit at high temperature when not in use or during idle periods.

This will cause food particles and grease film to carbonize.

"Season" cooking surfaces with non-salted vegetable oil to reduce product sticking.

MONTHLY LUBRICATION/INSPECTION

Above: Oiling the Hinge,

Below: Tightening the top housing

Apply two (2) drops of non-toxic mineral or vegetable oil to hinge bracket at the rear.

Check the bolts, screws and nuts, tighten if necessary.

TOP HOUSING MAINTENANCE

The Spring setting which holds the top housing in the up position is set at the factory and should provide many years of use without the need of adjusting.

After an extended period of time the top housing may not maintain its original setting, therefore the spring tension can be adjusted by tightening and loosening the Retainer bolts on the back of the unit.

CLEANING

While holding top lid with one hand, apply only cleaners which are safe for aluminum **and iron surfaces**. **Wipe with clean sponge or towel until unit is clean.**

1. If particles adhere to the cooking surface during the day, scrape them off with a spatula or stiff brush.

NOTE: It is best not to let food cook on to the grill, as build up of food on the grill will increase sticking and smoking. In addition, carbon may build up on the grill surface and reduce the cooking efficiency.

2. At the end of the day, wipe down all surfaces with a warm, damp cloth, use a mild detergent on all non-cooking areas and then dry entire unit.
3. Remove and empty to clean grease catcher cup as required using mild detergent and water.

CLEANING CARBON BUILDUP

1. When carbon build up occurs, use a carbon removal agent to clean cooking surface. When this process is completed, you must re-season the grill (See Seasoning Grill).
2. Acidic cleaners are NOT recommended as a cleaning agent.

DO NOT IMMERSE OR LET THE UNIT STAND IN WATER.

DO NOT HOSE DOWN THE UNIT OR THE TABLE/COUNTER IF THE UNIT IS ON THE TABLE/COUNTER.

KEEP AWAY FROM RUNNING WATER.

CLEANING cont

CAUTION

**DO NOT USE SHARP OBJECTS TO REMOVE CARBON BUILD-UP.
BEFORE CLEANING MAKE SURE POWER IS TURNED OFF, UNIT IS
UNPLUGGED AND IS NOT TOO HOT.**

WARNING

**DO NOT SPLASH WATER ON FRONT CONTROL PANEL!
DO NOT SPLASH WATER ON FLEX CONDUIT CONNECTING TOP AND
BOTTOM OF THE UNIT.**

WARNING

Do not use ice or cold water to clean the cooking surfaces when the unit is hot. The surfaces are cast aluminum or cast iron and may crack or deform under the shock of rapid temperature change.

OPERATION TROUBLESHOOTING

1. Unit not heating.

- A. Check if unit is plugged in correct receptacle.
- B. Check incoming power line.
- C. Check that thermostat is set to proper temperature.

If unit still does not operate contact the factory or one of its representatives or a local service company for service or required maintenance.

LIMITED EQUIPMENT WARRANTY

Star Manufacturing [as well as its subsidiaries] warranties new products to be free from defects in material and/or workmanship for a period of one [1] year from the date of original installation, except as noted below. Defects that occur as a result of normal use, within the time period and limitations defined in this warranty, will at Star's discretion have the parts replaced or repaired by Star or a Star-authorized service agency.

THIS WARRANTY IS SUBJECT TO ALL LISTED CONDITIONS.

Repairs performed under this warranty are to be performed by a Star-authorized service agency. Star will not be responsible for charges incurred or service performed by non-authorized repair agencies. In all cases, the nearest Star-authorized service agency must be used.

Star will be responsible for normal labor charges incurred in the repair or replacement of a warrantied product within 50 miles (80.5 km) of an authorized service agency. Time and expense charges for anything beyond that distance will be the responsibility of the owner. All labor will need to be performed during regular service hours. Any overtime premium will be charged to the owner. For all shipments outside the U.S.A. and Canada, please see the International Warranty for specific details.

It is the responsibility of the owner to inspect and report any shipping damage claims, hidden or otherwise, promptly following delivery.

No mileage or travel charges will be honored on any equipment that is deemed portable. In general, equipment with a cord and plug weighing less than 50 lb. (22.7 kg) is considered portable and should be taken or shipped to the closest authorized service agency, transportation prepaid.
