

Persons under age 18 are not permitted to operate or  
have accessibility to operate this equipment per  
U.S. Dept. of Labor Employment Standards  
Administration Fact Sheet No. ESA91-3.

**univex**

**TO INSURE BOTH SAFE AND  
TROUBLE-FREE PERFORMANCE WE STRESS  
THAT ALL PERSONNEL THAT WILL BE  
INVOLVED WITH YOUR NEW UNIVEX G PEELER  
MUST READ AND UNDERSTAND THESE  
INSTRUCTIONS BEFORE ATTEMPTING TO  
OPERATE THIS UNIT.**

.....

**WE APPRECIATE YOUR COOPERATION AND  
YOUR BUSINESS. SHOULD THERE BE A  
QUESTION OR IF WE CAN BE OF FURTHER  
ASSISTANCE, PLEASE CALL US,  
1-603-893-6191.**

**OPERATOR SAFETY**

**IT IS A VIOLATION OF UNITED STATES DEPARTMENT OF LABOR REGULATIONS TO PERMIT OPERATION OF THE G-PEELER BY ANY PERSON UNDER THE AGE OF 18 YEARS.**

**READ AND MAKE SURE THAT YOU UNDERSTAND INSTRUCTIONS AND SAFETY WARNINGS BEFORE ATTEMPTING TO OPERATE THE PEELER.**

**NEVER PUT FINGERS OR HANDS IN PEELER WHILE THE PEELER IS OPERATING OR SERIOUS INJURY COULD RESULT.**

1 - COVER

2 - WATER INLET TUBE

3 - FLEXIBLE HOSE

4 - ELECTRICAL CORD

5 - TIMER KNOB

6 - DRAIN OUTLET

7 - DISCHARGE DOOR

## INSTALLATION

After peeler has been removed from carton, remove cover, shipping spacer, water inlet hose and any literature packed in the peeler. Place peeler on sink drain board or any suitable location. Be sure that drain outlet [Fig. 1 (6)] is located so that water and peelings will discharge into sink.

Pull up into position water inlet tube (Fig. 1 [2]). Turn tube in holder positioning it towards the center of the peeler.

Install cover. Slip small end of flexible hose (Fig 1 [3]) over water inlet tube. Attach large end into cold water faucet; close and latch discharge door [Fig. 1 [7]]

**CAUTION:** Before making electrical connections, check the specifications on the nameplate to make sure that they agree with those on your electric service. Plug electric cord (Fig. 1 [4]) into AC outlet.

## OPERATING INSTRUCTIONS

After machine has been properly installed, adjust cold water faucet for a small flow of water to flush away peelings.

To start peeler: Turn timer knob (Fig. 1 [5]) beyond desired time, then turn back to three minute mark. This is the average time required to peel a 20 lb. load.

Insert potatoes or other vegetables through opening in cover (Fig. 1 [1]).

Timer (fig 1 [5]) will automatically stop unit. Inspect vegetables. If you are satisfied with peeling, unlatch discharge door. Have receptacle ready to receive vegetables - or discharge directly into sink. To eject the vegetables, start machine (by turning timer), hold door partly open. Rotation of peeling disc will eject load. Timer may be turned off and on without damage.

Peeling time will vary with the size, shape and condition of potatoes or vegetables. The three minute average peeling time may have to be increased or decreased accordingly. The estimated capacity of 20 lbs. is based on US Grade 1 potatoes. Unusually large or long potatoes may require a slight reduction in load to obtain satisfactory results.

**CAUTION: DO NOT OVERLOAD. THERE SHOULD BE AT ALL TIMES ROOM IN THE PEELER FOR COMPLETE TUMBLING OF VEGETABLES FOR PROPER PEELING.**

Noise emissions below 70 db(A).

## CLEANING

**WARNING: DISCONNECT ELECTRIC POWER BEFORE CLEANING.**  
Proper cleaning is essential for insuring the long life of your UNIVEX peeler.

As soon as peeling is complete and before peeled particles dry and stick, remove cover (Fig. 2 [2]) and peeling disc (Fig. 3 [3]), wash thoroughly with cold water only.

Wash inside of peeler and flush out thoroughly with flexible hose. Allow discharge door to remain unlatched, thus prolonging the life of the door seal.

## MAINTENANCE

**WARNING: DISCONNECT THE ELECTRICAL POWER PRIOR TO PERFORMING ANY MAINTENANCE**

Maintenance is simple and has been kept to a minimum through modern engineering design.

To expose driving mechanism for service, lay unit on side and remove bottom cover (Fig. 2 [11]).

To replace belt, (Fig. 4 [3]) release tension spring (Fig. 4 [8]) to loosen belt. Hold motor in slack position and roll belt off the large pulley. (Fig. 4 [5]) Reverse procedure to install new belt. Do not use any metallic tools to force belt over pulleys. To do so will greatly shorten belt life.
